

Transport Truck TW 52/800

A sturdy, torsion-resistant frame construction made of stainless steel with 4 heavy duty castor wheels, 2 of them lockable, $d = 200$ mm with special roller bearings, permanently lubricated and maintenance-free ensures an easy and silent movement. The height of the top can be adjusted electrically and tilted up to approximately 25° on both sides. A stainless steel roller track comprising 5 carrying rollers of corrosion-resistant material and noise absorbing plastic coating has been arranged on top of the truck. A holding device at the roller track secures the body tray lying on it.

Additionally, the transport truck is equipped with a traction drive unit which enables an easy movement even when transporting heavy duty. The transport speed can be adjusted smoothly with the control panel and the replaceable accu is equipped with a battery display. An electronic rapid charger for the 24V/230 Volt accu is included in the scope of delivery.

This transport truck has been particularly designed for lifting corpses from hospital beds onto body trays. Moreover, thanks to the integrated traction drive the transport truck is also suitable for long routes of transport.

Technical Data:

Dimensions W/D/H:	2130 x 750 x 650/1050 mm
Lifting range:	400 mm
Carrying capacity:	max. 300 kg
Material:	stainless steel
Type:	TW 52/800
Article No.:	050.150.095

Transport Truck TW 52/800-WTP with a Washing Table Plate

A sturdy, torsion-resistant frame construction made of stainless steel with 4 heavy duty caster wheels, 2 of them lockable, d= 200 mm with special roller bearings, permanently lubricated and maintenance-free ensures an easy and silent movement.

The height of the top can be adjusted electrically and tilted up to approximately 25° on both sides. The lifting columns are being operated by means of a replaceable accu. A rapid charger and a wall mount are included in the scope of delivery.

Additionally, the transport truck is equipped with a traction drive unit which enables an easy movement even when transporting heavy duty. The transport speed can be adjusted smoothly with the control panel and the replaceable accu is equipped with a battery display. An electronic rapid charger for the 24V/230 Volt accu is included in the scope of delivery.

A washing plate made of brushed stainless steel with a high surrounding profile as well as a negative inclination arranged diagonally to the drain is mounted onto the transport truck and can be easily docked to the Installation Column INSS 10/680.
